CNET INSTRUCTION 3140.1E

Subj: DESTRUCTIVE WEATHER BILL FOR CNET AREA OF RESPONSIBILITY

Ref: (a) OPNAVINST 3440.16C
(b) CNBJAXINST 3440.2A
(c) OPNAVINST 3140.24E
(d) CNATRAININST 3140.4L (NOTAL)

Encl: (1) List of Naval Shore Activities within CNET AOR
(2) Description of Charlie Areas within CNET AOR
(3) Weather Warnings and Conditions of Readiness provided by CNET
(4) CNET DPO Emergency Communication Circuits

1. Purpose. To clarify areas of responsibility and procedures for destructive weather warnings and tropical cyclone conditions of readiness and to issue a basic destructive weather instruction within the Chief of Naval Education and Training (CNET) area of responsibility (AOR), as assigned by references (a) and (b).

2. Cancellation. CNETINST 3140.1D

3. Revision. Since this is a major revision, marginal notations are not annotated. This instruction should be read in its entirety.

4. Information. Reference (a) provides guidance on the relationships and responsibilities of military and civil emergency response organizational structures. Reference (b) provides general guidance concerning weather warnings and conditions of readiness. Reference (c) delegates responsibilities to Commander, Navy Region Southeast, Jacksonville Regional Planning Agent (RPA) to set Tropical Cyclone Conditions of Readiness and to issue warnings for local or less serious weather phenomena for their respective areas. Reference (d) contains general responsibilities for aircraft hurricane evacuation.

5. Discussion. Enclosure (1) is a list of naval activities located within the CNET AOR (Area "C"). As the Area Coordinator, CNET sets Tropical Cyclone Conditions of Readiness for individual areas as shown in enclosure (2). By direction, the Naval Training Meteorology and Oceanography Facility (NAVTRAMETOCFAC), Pensacola issues destructive weather warnings, as shown in enclosure (3), for activities in Area "C." Local commanders are ultimately responsible for timely actions to avoid or minimize damage to facilities or injury to personnel. Enclosure (4) lists

the CNET Disaster Preparedness Office (DPO) Emergency Operations Center (EOC) Emergency Communications Circuits.

6. Action

a. Commanders and commanding officers shall utilize all available weather information to avoid or minimize loss and damage by destructive weather phenomena. Those activities not supported by a local NAVTRAMETOC DET should monitor information available from the Air Weather Service, National Weather Service, or local media.

b. Routine procedures shall provide for the safety of personnel, property, and equipment under the seasonal conditions that are normally encountered. Routine procedures shall also provide for rapid dissemination of destructive weather information and timely setting of Conditions of Readiness. It should be remembered that the setting of a lower Condition of Readiness is not a prerequisite for the setting of a higher condition.

c. CNET. Set and cancel all Tropical Cyclone Conditions of Readiness and disseminate via naval and commercial telecommunications facilities as appropriate.

(1) Vice CNET. Upon setting of Condition II, or as deemed appropriate, ensure CNET EOC is activated and direct EOC operations as necessary.

(2) CNET (OS4). Serve as cognizant CNET Division Director for destructive weather matters, advise Vice CNET regarding EOC activation, and provide required support to the Naval Air Station (NAS), Pensacola/CNET DPO.

(a) Ensure sufficient CNET senior officers are assigned to the EOC as watch standers in support of Vice CNET.

(b) Ensure Area "C" supporting and supported activities are adequately exercised prior to setting Tropical Cyclone Condition V on 1 June.

(3) CNET Disaster Preparedness Manager (DPM) (OS4D). Coordinate with all activities listed in enclosure (1) to ensure maximum operational readiness for destructive weather conditions.

d. Chief of Naval Air Training (CNATRA). Authority for coordinating and implementing aircraft hurricane evacuation (HUREVAC) plans for CNET naval air activities is delegated to CNATRA, who is designated HUREVAC Commander for CNET. The HUREVAC Commander shall:

(1) Comply with provisions of reference (d) in the preparation and execution of aircraft HUREVAC plans. Additionally, HUREVAC plans for NAS Pensacola shall provide an executive

aircraft (H-3) and crew for transporting senior CNET staff officers.

(2) Set HUREVAC Conditions as described in reference (d). The setting of HUREVAC Conditions is entirely separate from and should not be confused with the setting of Tropical Cyclone Conditions of Readiness.

(3) Establish appropriate actions to be taken under each HUREVAC Condition.

e. Commanding Officer, NAVTRAMETOCFAC Pensacola

(1) Issue destructive weather warnings and nontropical conditions of readiness as shown in enclosure (3) for activities within Area "C."

(2) Make recommendations to CNET regarding setting and cancellation of all Tropical Cyclone Conditions of Readiness.

(3) Make recommendations to the HUREVAC Commander, or his/her designated representative, regarding setting and cancellation of HUREVAC Conditions.

(4) Maintain close liaison with CNET OS4 and CNET DPM (OS4D) to ensure timely notification of changing tropical weather conditions and forecasts.

f. Supporting Activities. Enclosure (1) lists those activities assigned primary support responsibilities by virtue of their assets and resources. The supporting activity commander shall:

(1) Ensure timely notification of destructive weather warnings and conditions of readiness to supported activities.

(2) Review Destructive Weather Bills of supported activities for completeness, uniformity, and compliance with reference (b), this instruction and with tasking assigned by supporting activities. Submit an annual report of this review to CNET (OS4D) by 15 April. Submit an updated list of supported activities to CNET (OS4D) prior to 1 February annually.

(3) Receive attainment reports from supported activities for Tropical Cyclone Conditions V through I. Additionally, make composite attainment reports of each Condition of Readiness to the CNET DPM (OS4D) at the CNET EOC. Containment reports shall be made utilizing the following methods in priority order:

(a) CNET EOC Web Site (ntmof.navy.mil)

(b) CNET EOC FAX: DSN 922-5710

(c) CNET EOC Voice: DSN 922-4481/2/3

(d) CNET EOC Commercial FAX: (850) 452-5710

(e) CNET EOC Commercial Voice: (850) 452-4481/2/3

(f) Satellite phones as listed in enclosure (4)

(4) The CNET EOC will maintain HF communications per reference (b).

(5) Coordinate utilization of emergency recovery resources (personnel, material, and medical facilities) in respective supported activities.

(6) Coordinate requests for emergency assistance. If requests are beyond the scope of the activity capability, request assistance from the CNET EOC. All requests from civil authorities shall be cleared through the CNET EOC. However, commanders are authorized to take immediate relief actions to save lives, prevent human suffering, or to mitigate great property damage prior to approval from CNET. Report such actions to CNET in accordance with procedures contained in Chapter XIII of reference (b). All aspects of Military Support to Civil Defense (MSCD) per reference (a) shall be adhered to.

(7) Designate hurricane shelters for use by military personnel, dependents residing in government quarters, and emergency civilian personnel who will remain onboard through Condition (1). Ensure shelters are equipped with appropriately stocked kits.

(8) Prepare and maintain a Destructive Weather Bill outlining in detail actions to be taken under each Tropical Cyclone Condition. Provide a copy to the CNET DPO (OS4D). The bills shall be prepared in accordance with Chapter V of reference (b) and should assign tasks to commanders of supported activities as appropriate. In addition, the bill shall include an evacuation plan outlining procedures, responsibilities, and guidance for tenants should the intensity of the storm require evacuating personnel with no means of transportation. The decision to secure normal operations, close the base, or evacuate is irrespective of tropical cyclone conditions and is the sole responsibility of the supporting commander. Intentions to evacuate an installation shall be reported to the CNET EOC. Destructive Weather updates or revisions shall be reviewed and approved by CNET (OS4) prior to publication to ensure agreement with other Disaster Preparedness Plans.

(9) Maintain and equip disaster recovery teams as appropriate.

(10) Have at least one officer with a secondary Navy Officer Billet Classification 2715; or enlisted billet, Navy Enlisted Classification 9598; or a qualified civilian DPM assigned.

(11) Comply with the responsibilities levied in paragraph 2-102C of reference (b).

g. Supported Activities. These include all other activities listed in enclosure (1) not assigned primary supporting responsibilities. These activities shall:

(1) Maintain a Destructive Weather Bill that includes a checklist itemizing actions to be taken on the setting of each Tropical Cyclone Condition. If no action is required for a particular condition, a "no action required" entry is appropriate. Provide the cognizant supporting activity with a copy of the Destructive Weather Bill.

(2) Advise the cognizant supporting activity commander, in writing by 1 April of each year, that the command Destructive Weather Bill has been reviewed and updated as necessary. A copy of any update to the bill shall be provided as indicated above.

(3) Upon notification, take action to set weather conditions, as applicable.

(4) Comply with tasking assigned by the cognizant supporting activity commander.

(5) Report attainment of Tropical Cyclone Conditions (V) through (I) to the supporting activity commander or his/her assigned representative. Should a decision be made to secure and vacate facilities, report intentions to do so to the supporting activity commander and set Condition (1) prior to vacating.

(6) Assign a Hurricane Officer as point of contact for the supporting activity commander. The Hurricane Officer shall notify the supporting activity commander of Temporary Additional Duty assignments and leave during the hurricane season.

h. Commanding Officer, NAS Pensacola

(1) As host commander for CNET Headquarters, equip and maintain the EOC for joint use by NAS Pensacola; Commander, Training Air Wing SIX; and CNET.

(2) Provide regional commander duties for all disaster-related events for all activities located onboard NAS Pensacola, Corry Station, and Saufley Field. Task each activity as required to support an efficient disaster preparedness organization.

(3) NAS Pensacola Disaster Preparedness Officer. Manage the CNET EOC. Advise and assist CNET (OS4) on all matters relative to disaster preparedness and disaster operations.

i. Commander, Training Air Wing FIVE. Provide hangar space for Search and Rescue helicopters.

j. All Activities within Area "C." Take additional measures (with CNET approval, to include the setting of a higher weather condition within a unit, if appropriate) to prevent injury to personnel and damage to facilities. Disseminate hurricane safety precautions contained in Chapter V of reference (b) to all hands and ensure their knowledge of the Activity/Unit Destructive Weather Bill.

7. Report. Report control symbol (RCS) CNET 3140-1 is assigned to the Destructive Weather Bill Review required in paragraphs 6f(2) and 6g(2). RCS CNET 3140-2 is assigned to the List of Activities Supported During Destructive Weather required in paragraph 6f(2). These reports are required for 3 years from the date of this instruction.

DESCRIPTION OF CHARLIE AREAS**WITHIN****CNET AOR**

1. AREA C-1: Encompasses both land and water areas of coastal Mississippi. This area is bounded on the East by the Alabama state line, on the North by 31.00 degrees North latitude, on the West by the Louisiana state line, and on the South by a line paralleling the coastline 50NM seaward into the Gulf of Mexico.

2. AREA C-2: Encompasses both land and water areas of coastal Alabama and the extreme western portion of Northwest Florida. This area is bounded on the East by the Okaloosa-Walton County, FL line; on the North by the Florida-Alabama state line and by the northern boundaries of Baldwin and Mobile counties in Alabama; on the West by the Mississippi state line; and on the South by a line paralleling the coastline 50NM seaward into the Gulf of Mexico.

3. AREA C-3: Encompasses both land and water areas of the central portion of Northwest Florida. This area is bounded on the East by the Apalachicola and Chattahoochee Rivers, on the North by the Florida-Alabama state line, on the West by the Walton-Okaloosa County, FL line, and on the South by a line paralleling the coastline 50NM seaward into the Gulf of Mexico.

4. AREA C-4: Encompasses the inland portions of the states of Alabama and Mississippi. This area is bounded on the East by the Alabama-Georgia state line, on the North by the Tennessee state line, on the West by the state line between Mississippi and Arkansas and Louisiana, and on the South by the northern boundaries of Areas C-1, C-2, and C-3.

WEATHER WARNINGS AND CONDITIONS OF READINESS

PROVIDED BY CNET

WARNING/CONDITION	TIME FRAME	WINDS	REMARKS
Tropical Cyclone Cond V	SEASONAL		SET FROM 1 JUN - 30 NOV
Tropical Cyclone Cond IV	W/I 72 HRS	HURRICANE 64 KTS OR >	WINDS ARE POSSIBLE
Tropical Cyclone Cond III	W/I 48 HRS	TROPICAL STORM	WINDS ARE POSSIBLE
